Seattle, WA

EDUCATION

Master of Science, Computer Science (Software Engineering) Seattle University Seattle, WA	April 2025 - June 2027 GPA: 3.5/4.0
Bachelor of Science, Computer Science California Polytechnic State University San Luis Obispo, CA	September 2020 - August 2024 GPA: 3.0/4.0

EXPERIENCE

Software Consultant @ Freelance Seattle, WA - Gathering requirements and collaborating with key stakeholders to modernize the Puget Sound Plumbing & Heating website. - Leveraging React, FastAPI, and AWS to build a scalable, high-performance static site focused on improving user engagement. - Presenting weekly progress reports using Google Slides to stakeholders, ensuring project alignment and full transparency.	September 2025 - Present
Computer Vision Research Assistant @ Seattle University Seattle, WA - Led a 3-person research team to design and develop a vision-based pre-collision avoidance system for sailboats and bridges. - Defined system requirements, site geometry, and implementation strategies to guide the project's technical execution. - Compiled a tailored dataset for model training by collecting and labeling 1,500 images (bounding boxes and mast-tip points). - Evaluated three mast-tip detection methods using YOLO object detection, reducing mast-tip localization error by 15%.	June 2025 - September 2025
Membership Sales Representative @ Columbia Athletic Club Sammamish, WA - Temporarily filled in for a membership representative on medical leave, handling sales, tours, and account management. - Analyzed 673,000+ sales records to identify top products, uncover trends, and forecast sales using pandas, matplotlib, and RNN. - Devised a React QR-based form system, reducing prospect onboarding time by 50% and eliminating the need for paper storage. - Engineered a supervised solution for automating email responses using Jupyter, Python, and cloud APIs (OpenAI, Gmail)..	December 2024 - Present
Computer Science Tutor @ Freelance San Luis Obispo, CA - Launched a tutoring service that helped 30+ K-12 and undergraduate students achieve their academic computer science goals. - Developed a client management application with React, FastAPI, and Supabase to track lessons, progress, and payments.	June 2023 - March 2025
Real Estate Intern @ 206 Realty Bellevue, WA - Migrated 10 Excel files into a PostgreSQL database and developed FastAPI endpoints for efficient and accurate querying. - Oversaw a lead generation pipeline, executed 2,000+ cold calls and qualified 300+ prospects, resulting in \$2,500,000+ in sales.	June 2022 - August 2022

PROJECTS

Auto-Styler Jupyter Notebook, Python, Segment Anything Model (SAM), Grounding DINO, Stable Diffusion 3 Built a pipeline for instance segmentation and recoloring Toyota of Bellevue vehicles using SAM and replacing backgrounds using Stable Diffusion 3, including testing point prompts and Grounding DINO for segmentation inconsistencies and prompt sensitivity.	June 2025
Cooped-Up React, FastAPI, OpenAI API, Adobe Illustrator Created a multimodal social media post generator for Ezell's Famous Chicken for Instagram, Facebook, and LinkedIn using React, FastAPI, and OpenAI's API (GPT & DALL-E) and refined prompts to ensure consistent styling and quality content creation.	February 2025
Gridiron GPT React, FastAPI, PostgreSQL, Supabase, OpenAI API, Leaflet, Adobe Illustrator - Crafted a fantasy football analytics web application featuring an AI search tool, draft assistant, trade analyzer, and rankings tables. - Automated a Python pipeline to clean and append NFL records from 10 sources into a Supabase database of 300,000+ entries. - Developed a REST API using FastAPI and PostgreSQL to retrieve data from the Supabase database for the React frontend.	April 2024 - August 2024
Haggle React, Express.js, PostgreSQL, Supabase, AWS, Google Cloud Platform, Adobe Illustrator - Spearheaded the development of a student marketplace in a 5-person team to address waste from last-minute move-out surplus. - Managed the project by crafting a roadmap, defining user stories and personas, overseeing GitHub backlog, and delegating tasks. - Engineered a user authentication system with Google OAuth 2.0, bcrypt hashing, JWT sessions, nodemailer, and hCaptcha. - Integrated TalkJS for real-time chat, AWS S3 for image storage, and added search categories for efficient product discovery.	April 2024 - August 2024

TECHNICAL SKILLS

- Languages:** Python, Java, C, Javascript, HTML, CSS, SQL
- Frameworks:** React, FastAPI, Express.js, Tensorflow, Keras, Apache Spark
- Developer Tools:** Git, AWS, Google Cloud Platform, Kubernetes, Docker, Snowflake, Supabase, Cursor, Visual Studio, Jupyter, Comet
- Libraries:** scikit-learn, pandas, NumPy, matplotlib, OpenCV, BeautifulSoup, Selenium, OpenAI API, Leaflet
- Design Tools:** Adobe Illustrator, Adobe Photoshop, Unicorn Studio, Suno, DALL-E, Midjourney, Figma
